In a shocking revelation, Dr. James Thorpe supports the alarming accusations made by Dr. Alexandra "Sasha" Latypova, alleging a heinous act of mass genocide against both American and global populations.

This sinister act, supposedly orchestrated by the Department of Defence in collusion with the World Economic Forum, is described as a deliberate depopulation strategy.

According to Latypova, the Department of Defense (DoD) had "very clear intent to harm" by executing a "mass genocide of Americans."

Under the DoD's control and direction, drug manufacturers like Pfizer, Moderna, and Janssen started mass-producing the shots for Operation Warp Speed – long before the first cases of Covid even appeared, it turns out. These "figurehead" organizations, Latypova insists, were just obeying the DoD's orders.

Dr. Thorpe presents harrowing statistics, claiming that these malevolent forces are responsible for the deaths and injuries of 585 million people worldwide.

He vehemently states, "This is very clearly a depopulation agenda."

He further compares the harm caused by the vaccine, which he refers to as a "genetic therapy," to historical atrocities.

According to his analysis, the vaccine's injure-to-kill ratio surpasses the devastation of all past world wars and even eclipses the catastrophic effects of the drug thalidomide, known for its tragic consequences.

Dr. Thorpe's comparison of the vaccine's impact to the atomic bombings of Hiroshima and Nagasaki underscores the gravity of his claims.

Adding to the controversy, he alleges that Pfizer concealed 80% of its trial data, implying a sinister cover-up of monumental proportions by these globalist entities.
